Vent System Approval & Requirements

This fireplace is manufactured to accept 4"x 6-5/8" pipe only.

- Simpson Dura-Vent™ DV-PRO Pipe
- Selkirk Metalbestos™ direct chimney system
- Ameri-Vent/American Metal™direct chimney system
- SecurityTM
- Metal FabTM
- ICCTM
- Kozy Heat™ Flexible #700 series vent kits*
- BDMTM direct vent chimney system

IMPORTANT: A wall thimble/pass thru must be used on ALL horizontal vent runs that pass through interior OR exterior walls. (follow vent manufacturers instructions)

The included horizontal vent heat shield must be installed when incorporating minimum horizontal venting. This applies to NG and LP minimum horizontal venting configurations.

Elbows: For each additional 90° elbow used after the first elbow, 3' must be subtracted from the maximum venting allowed. For each additional 45° elbow used after the first elbow, 11/2' must be subtracted from the maximum venting allowed. Note: (2) 45° elbows = (1) 90° elbow.

Horizontal Terminations

Minimum: 90° elbow + 6" + cap. Maximum: 90° elbow + 14' + cap

Vertical Terminations

Minimum: 3' + vent cap Maximum: 50' + vent cap

In order to continually provide the highest quality product available, features/options, specifications & dimensions are subject to change. Refer to the unit installation manual for complete installation instructions. Installation must conform with local building codes. In some regions it may be possible that this appliance qualifies for an energy rebate. See your local dealer for details regarding promotions and qualifications.
